your water charges

in this booklet we will briefly explain

- What Severn Trent Water does
- How we charge you – households and non-households
- Vulnerable households
- How to pay
- What to do if you are unhappy about the service you have received
- How to contact us – useful contact numbers and addresses

what Severn Trent Water does

We serve over eight million people across the heart of Britain. We supply drinking water to the highest standards in Europe – some two thousand million litres every day. We take away the used water and treat it again at one of over a thousand sewage works before putting it safely back into the environment.

We are investing more than £400 million a year to improve services to customers. This includes making even more high quality water available, improving sewers to stop flooding and cleaning up our rivers.

In fact since privatisation, we have invested over £6 billion – over £2,000 for each and every home we serve. As a result, customers are getting their best ever quality drinking water and supplies are secure irrespective of what the climate has in store. Hundreds of homes are safe from flooding as a result of improvements in our sewers. Rivers in the Midlands are now much cleaner than before, thanks to our investment in new facilities for cleaning the community's used water.

Investment levels now are slightly lower than the years immediately after privatisation, when we had a number of major programmes which had to be completed quickly to make up for years of under investment. Nonetheless, we continue to spend at levels much higher than those seen in the days of public ownership. We will continue to spend money wherever necessary to ensure all our customers receive high quality services, whilst keeping bills amongst the lowest in the country.

how we charge you

We charge the majority of our customers either

- Unmeasured charges
- Measured charges

unmeasured charges

If your property was built before April 1989 it is likely that you will be paying unmeasured charges. Unmeasured charges are all based on the 1989/90 rateable value of the property. As there are differences in the average levels of rateable value throughout our area, we vary the charge according to the area (or zone) you live in. If you move house, charges will continue to be levied in the same way as the previous occupier. All non-household properties are required to be metered.

Your unmeasured charges are made up of three elements:

Unmeasured water supply

- This covers the costs of providing water to the property (A minimum charge applies).

Used water

- This covers the cost of removing, treating and disposing of the used water.

Surface water drainage

- This covers the cost of draining rainwater. If none of your rainwater drains to the public sewer then you will be exempt from this element of your charges. The effective date of any claim will be 1 April of the charge year.

your choice to be metered

If you are a household customer who pays unmeasured water service charges you can choose to have a water meter installed and pay for the amount of water you actually use.

The meter is fitted free inside your property. The position of the meter will normally be where the water supply pipe enters the house. You may choose an alternative location if reasonably practicable, provided you pay for any additional expenses incurred. This will be explained to you when you apply for a meter. It is our aim to install a meter in your property within six weeks of receiving your application. If we fail to do so, we will use the first meter reading as a basis for back dating to the start of the excess period, thus ensuring you still receive the full benefits of metering.

There will be circumstances where metering is not reasonably practicable or involves unreasonable expense and therefore we will not fit a meter. If this is the case, you can opt to pay by an assessed volume related charge, based on type of property, instead of unmeasured charges. Alternatively you can make all the necessary alterations to the pipe work yourself so that a meter can be fitted. For blocks of flats, if meters cannot be fitted individually, it is possible for a group to have a legally binding agreement that a single meter is fitted. Any disputes regarding Severn Trent Water's refusal to install a meter can be referred for resolution to the Water Services Regulation Authority. (For address see useful contact numbers and addresses section).

The change in charging basis from unmeasured to measured will be effective from the date of installation of the meter. Your charges for the supply of clean water and the removal of used water will be based on meter readings. The surface water drainage charge will be based on the type of property. If you decide that metering is not for you, you have a maximum of 30 days after issue of the second six monthly bill in which to request returning to an unmeasured basis of charge, providing the rateable value of your property is still valid.

If you wish to apply to pay your charges on a measured basis, you can do so by telephoning or writing to the address shown in the section on useful contact numbers and addresses.

assessed volume charges

For household properties that have been substantially altered making the rateable value invalid, you can opt to have a meter installed (see Your Choice to be Metered) but if you do not, or if it is not reasonably practicable or is unreasonably expensive to fit a meter, you will be charged on assessed volume charge banded according to type of property.

For household properties where the customer wishes to be metered but due to the practicality or to unreasonably high cost, Severn Trent Water will not fit a meter, you can opt to pay the assessed volume charge.

For non-household properties where meter installation is not reasonably practicable or is unreasonably expensive, an assessed volume charge will apply, banded by type of business.

measured charges

If your property was built after April 1989 you will be paying for water services on a measured basis. Householders that opted, at their present address, for a meter before 1 April 1996 can revert to paying by rateable value provided that the property still has a valid rateable value. Householders that opted, at their present address, for a meter after 1 April 2000 can revert to paying by rateable value at any time prior to the twelve month anniversary of the meter having been installed or 30 days after receipt of a second measured bill, provided that the property still has a rateable value. Properties that have a swimming pool or use an automatic garden watering device (i.e. a hosepipe not held in the hand) must be metered. Household measured bills are sent half yearly. All non-households are required to be metered.

Three elements of measured charges apply:

- **Water supply charge**

This is based on the water measured by the meter. For properties with a supply greater than 15mm, a minimum charge applies. In addition we levy a standing charge which is based on the meter size. This covers the extra cost of reading, billing and maintaining the meter and eventually replacing it.

- **Used water**

This is also based on the water used and measured by the meter. In addition there is a standing charge (see water supply). For most customers we assume that the volume of 'water in' is the same as the volume of 'water out', i.e. returned to sewer. The unit charge has been set at a level that reflects normal losses. This covers miscellaneous non-returns to the sewer, e.g. evaporation from cooking, clothes washing, bathing, hot water equipment and garden watering. If you believe that you have more than normal losses, and can prove this by measurement, you can claim a reduction in the volume of used water.

- **Surface water drainage**

This is normally based on the 1989/90 rateable value of the property and covers the costs of draining rainwater.

However, new properties or other properties without a valid 1989/90 rateable value and customers that have chosen to have a meter will pay for surface water drainage by property type charge. Existing metered household customers can choose to pay by property type instead of rateable value. The start date of this change will be from the date of application. All non-household properties will pay for this element of the charge by a banded charge according to their total site area (see Scheme of Charges). The three exemptions to this are schools, hospitals and places of religious worship.

If you can show that your property has no surface water draining to the public sewer, you will be exempt from this element of the charge. Any claims will only be back dated to 1 April of the charging year in which the claim is made.

If you pay someone else for part of your surface water drainage (e.g. British Waterways) you may be entitled to claim a reduction from us. Further information, including the application form can be obtained from the address shown in the useful contact numbers and addresses section.

If you are a householder and there is a leak on your supply after the meter, you may be entitled to have your bill adjusted, provided you have repaired the leak quickly and it was not due to your negligence. Only one adjustment will be given and this will only affect the latest bill. Further information can be obtained from the address shown in the useful contact numbers and addresses section.

In addition to the used water charges, if you carry on a trade that deposits more than just a domestic type of effluent down our sewers, you will be charged according to the strength of the effluent. For more information on this tariff see our Scheme of Charges for Trade Effluent that explains the tariff in greater detail.

vulnerable households

If you are a metered customer and you or a person living with you falls into one of the following categories you may qualify for the special arrangements that apply to vulnerable households under the Water Industry (Charges) (Vulnerable Groups) Regulations 1999.

These arrangements mean that where you use a lot of water, you need not pay more than the average household bill for the Severn Trent Water region.

To have your bill capped in this way you need to fall into one of two categories:

You, or the person living with you, must be entitled to receive one or more of the following:

- council tax benefit
- housing benefit
- income support
- working tax credit
- child tax credit (except families in receipt of the family element only)
- income based job seeker's allowance
- pension credit

and either

- is entitled to receive child benefit for three or more children under the age of nineteen who reside in the premises

or

- has been diagnosed as suffering from, or has a child under nineteen who resides with you that has been diagnosed as suffering from, one or more of the following:
 - desquamation
 - weeping skin disease
 - incontinence
 - abdominal stoma
 - Crohn's disease
 - ulcerative colitis
 - renal failure requiring dialysis at home
(provided that no contribution to the cost of the water consumed in the process is made by the health authority)
 - any other medical condition as certified by a registered medical practitioner

and is obliged as a result to use a significant amount of extra water.

If you use a garden sprinkler or automatic garden watering device or have a swimming pool, you will not be eligible for this tariff. Further information on these arrangements and the required form can be obtained from the Company by telephoning or writing to the address shown for general enquires in the useful contact numbers and addresses section.

how to pay

Unmeasured bills are normally sent out in February/March each year with two payment stubs due on 1 April and 1 October. Customers can elect to pay instead by eight monthly amounts commencing normally on 1 April or such other date as agreed. Persons experiencing difficulty with payment should contact the company immediately where the possibility of more frequent payments can be arranged. (e.g. fortnightly or weekly).

Measured bills are normally sent to households six monthly in arrears and are due on demand. However, budget arrangements can be made with the Company. Non-households may be billed more frequently; monthly, quarterly or half yearly, depending on the volume of water used.

Payments may be made:

- by direct debit (at no extra cost)
- by debit or credit card by ringing 08457 500 500 (at no extra charge for payment by debit card but credit card payments will be subject to an additional charge equivalent to the charge payable by the Company to the credit card provider)
- by cash at a Paypoint Outlet (at no extra charge)
- at Lloyds Bank (at no extra charge for payment by cheque but a charge may be made for cash payments) or at your own bank (ask the bank if a charge is payable)
- by using Watercard with cash payments at a Post Office (at no extra charge)
- at a Building Society (ask your own society for details)
- through Girobank, if you have an Alliance and Leicester Girobank account
- by post to the address on your bill
- by internet banking, using e-payment facilities of your bank or building society
- electronically by debit card (using Girobank Bill Pay service) via our website: www.stwater.co.uk

Please note that none of the above external companies are agents of Severn Trent Water.

what to do if you are unhappy about the service you have received

If you feel your initial enquiry has not been properly answered or you still have a problem that our staff cannot resolve, please telephone **08457 500 500** and ask to talk to our Customer Relations Manager. If you are still not satisfied, you can have your enquiry reviewed by our Customer Relations Complaints Review Team by writing to:

Customer Relations Complaints Review Team
 Severn Trent Water Ltd
 Sherbourne House
 St. Martin's Road
 Finham
 Coventry
 CV3 6SD

or direct through our website on: www.stwater.co.uk

taking the process further

If you have had your complaint fully reviewed by Severn Trent Water and you remain dissatisfied, you can ask for an independent review by calling the Consumer Council for Water Midlands (CCWater Midlands) on **08457 023 953** (local call rates) or by writing to:

Consumer Council for Water Midlands
 1st Floor
 Victoria Square House
 Victoria Square
 Birmingham
 B2 4DL

or via email to: midlands@ccwater.org.uk

or via their website on: www.ccwater.org.uk

If you are unhappy with the way in which your complaint has been handled locally, the Consumer Council for Water (CCWater) also based at Victoria Square House will consider matters. The Consumer Council for Water will advise customers about the dispute resolution powers that the Water Services Regulation Authority (WSRA) may have regarding their complaint. The WSRA can be contacted by writing to the following address:

Water Services Regulation Authority
Centre City Tower
7 Hill Street
Birmingham
B5 4UA

or by telephoning:

0121 625 1300

please note: office hours are:

Monday – Friday 08:00 hrs – 20:00 hrs
Saturday 08:00 hrs – 13:00 hrs

charging zones for unmeasured charges

For unmeasured charges Severn Trent Water uses eight charging zones to reflect the differences in the rateable values of similar properties within its region. This map provides a guide to the areas covered by each zone. The area marked 'S' is where the water supply is provided and charged for by South Staffordshire Water plc.

summaries of unmeasured and measured tariffs

The following four pages provide a simple illustration of how the Company's charges are applied according to the characteristics of the individual customer. Measured tariffs are shown in more detail starting on page 13.

VAT

VAT will be added to water supply charges (including water for construction) raised to industrial customers who are defined within divisions 1-5 of the Standard Industrial Classification List 1980 (SIC). Water supply charges to all other customers are zero rated for VAT purposes.

Charges for sewerage services provided by Severn Trent Water are zero rated to all customers.

unmeasured tariffs

(Asterisk* indicates tariffs applicable)

	Unmeasured water supply	Full unmeasured sewerage	Surface water drainage	Used water
Service Details	Pence/£RV	Pence/£RV	Pence/£RV	Pence/£RV
1. Connected for water supply, all sewage drains to public sewer	*	*		
2. Connected for water supply, all sewage drains to cesspool or septic tank (no connection to public sewer)	*			
3. Connected for water supply, foul sewage drain to a public sewer but surface water drains from the property to a soakaway.	*			*
4. No connection for water supply, surface water drains from property to public sewer			*	

unmeasured tariffs

Scale of charges 2006/2007

	Unmeasured water supply (Note i & ii)	Full unmeasured sewerage	Surface water drainage (Note iii)	Used water
Charging zone	Pence/£RV	Pence/£RV	Pence/£RV	Pence/£RV
1	81.08	75.52	27.08	48.44
2	73.00	63.60	22.78	40.82
3	70.78	67.00	24.17	42.83
4	73.96	72.65	26.10	46.55

8	108.77	73.23	24.17

Notes:

- (a) Water supply chargeable meters are subject to a standing charge and minimum charge related to meter size. The charge stated is for consumption up to and including 9,999m³. For larger volumes see tariff on page 13.
- (b) The used water charge stated is for consumption up to and including 49,999m³. For larger volumes see tariff on page 15.
- (c) Surface water drainage
 - (i) Customers can opt to pay surface water drainage by a fixed charge (see page 16) instead of by pence per £RV.
 - (ii) For surface water drainage a maximum charge of £89,873.40 pa applies.

unmeasured assessed tariffs 2006/2007

1. water supply

Households	pa
Terraced, Flat	£129.44
Semi-detached	£165.33
Detached	£219.72

Non-household

Assessed volume at standard rate per cubic metre (see page 13).

2. used water

Households	pa
Terraced, Flat	£87.14
Semi-detached	£111.31
Detached	£147.92

Non-household

Assessed volume at standard rate per cubic metre (see page 15).

Notes:

In addition to the assessed used water charge, surface water drainage charge also applies (see page 16).

The above tariffs apply from 1 April 2006.

measured water supply tariffs 2006/2007

1. volume

For customers whose annual consumption is:

	Up to 9,999m ³		108.77 p/m ³
ECO 10	10,000 - 49,999m ³	- Peak (May - Sept)	110.23 p/m ³ *

250mm	£677.04	£19,604.04
300mm	£738.24	£28,653.36

Notes:

All standing and minimum charges are levied pro rata on a daily basis. The above tariffs apply from 1 April 2006 except for monthly billed customers. For these customers the above tariffs apply from the first complete meter reading on or after 1 April 2006.

measured water supply tariffs 2006/2007 (continued)

3. standby tariff

A. Capacity charge

Payable irrespective of whether any water is actually supplied by the Company.

Notified Volume m ³ per year	Peak (May-Sept) p/m ³	Off-peak (Oct-Apr) p/m ³	Standing Charge £
0-9,999	106.73	40.47	-
10,000-49,999	79.70	30.53	1,711.78
50,000-249,999	55.71	20.37	9,696.08
250,000+	54.95	19.60	8,610.58

The standing charge of £9,696.08 reduces to nil by 1.5p for each cubic metre of total notified volumes in excess of 50,000m³.

The standing charge of £8,610.58 reduces to nil by 1.5p for each cubic metre of total notified volumes in excess of 250,000m³.

Any volume that is actually used is charged at the rates in Table B below.

B. Volume charge

Payable with regard to all water supplied by the Company irrespective of the notified volumes.

Volume supplied m ³ per year	Volume Charge p/m ³	Standing Charge £
0-9,999	40.47	-
10,000-49,999	30.53	994.00
50,000-249,999	20.37	6,074.00
250,000+	19.60	6,999.00

The standing charge of £6,074.00 reduces to nil by 0.5p for each cubic metre of total notified volumes in excess of 50,000m³.

The standing charge of £6,999.00 reduces to nil by 0.5p for each cubic metre of total notified volumes in excess of 250,000m³.

If the volume used exceeds the notified volume, the Company is entitled to levy a charge of twice the notified volume charge shown in Table A above (excluding fixed or graduated charge). For the first 10% exceedance of the notified volume in either the peak or the off peak season, the Company may apply a reduced charge of one times the notified volume charges shown in Table A above.

4. vulnerable household charge

Capped at	£136.00pa
-----------	-----------

measured sewerage tariffs 2006/2007

1. used water

For customers whose annual consumption is:

up to 49,999m ³	73.23 p/m ³
50,000 - 249,999m ³	71.16 p/m ³
250,000 - 349,999m ³	67.82 p/m ³
350,000m ³ and over	67.82 p/m ³

2. standing charges

Meter Size	Charge pa
15mm	£10.24
22mm	£15.00
30mm	£20.16
42mm	£28.32
50mm	£38.88
80mm	£60.36
100mm	£102.00
150mm	£234.84
200mm	£296.04
250mm	£357.12
300mm	£389.28

Notes:

Standing charges are levied pro rata on a daily basis. The above tariffs apply from 1 April 2006 except for monthly billed customers. For these customers the above tariffs apply from the first complete meter reading on or after 1 April 2006.

3. vulnerable household charge

Capped at	£133.00 pa with surface water.
-----------	--------------------------------

Those properties without surface water, the relevant property type surface water drainage charge (see page 16) is deducted from this charge.

measured sewerage tariffs 2006/2007 (continued)

4. surface water drainage charges

For household properties the level of charge will be banded according to the type of property:

Band	Property type charge pa
1 (Flat, Terrace)	£23.88
2 (Semi-detached)	£47.88
3 (Detached)	£71.76

For non-household properties, the fixed charge will be banded according to site area.

Area (m ²)	Band	Site area charge pa
0-20	1	£7.92
21-99	2	£42.24
100-199	3	£84.48
200-299	4	£132.36
300-499	5	£211.56
500-749	6	£335.16
750-999	7	£469.80
1,000-1,499	8	£657.96
1,500-1,999	9	£882.00
2,000-3,999	10	£1,504.08
4,000-7,499	11	£2,891.52
7,500-9,999	12	£4,407.24
10,000-14,999	13	£6,287.76
15,000-19,999	14	£8,814.48
20,000-24,999	15	£11,341.44
25,000-29,999	16	£13,868.16
30,000-34,999	17	£16,371.60
35,000-39,999	18	£19,039.20
40,000-44,999	19	£21,683.16
45,000-49,999	20	£24,327.96
50,000-99,999	21	£38,023.56
100,000 and over	22	£89,873.40

For properties not connected to the public sewer for surface water drainage, this charge does not apply. Please note the above tariffs apply from 1 April 2006.
