

# Christmas day challenge...

Try this challenge with your family on Christmas day and tick each box once you've completed each step!

## 1. Keep your toys safe:

Did you know every year we get lots of toys in our sewers? That's because people accidentally drop them down the toilet! Make your presents last all year by going to the toilet without them.

**Fun fact:**  
Unlike toilet roll, did you know it takes years for 1 wet wipe to break up in water?

## 2. Bin wet wipes:

Christmas can be a messy time, but you can help keep our sewers clear - so our water can travel safely through and avoid burst pipes (caused by blockages) - by putting wet wipes in the bin.

## 3. Put fats, oils and grease (F.O.G) in the bin or use a fat collector:

Around Christmas time, we get lots these things put down the sink from people cooking Christmas dinners. Over time F.O.G can harden and block pipes which may cause a burst!

## 4. Drink tap water:

Christmas can be full of drinks that can make us dehydrated, make sure you drink the recommended amount of water for you on the big day (Aged 4-8 = 6 cups, aged 9+ = 8 cups).

**Don't forget it's really great to do all these things all of the time too!**
