

DESIGN A BAG!

Can you design a bag you won't forget?

Using a reusable bag instead of buying plastic bags will not only save money but will help to save the planet!

Remember to take your bag with you next time you go shopping!

RECYCLED T-SHIRT BAG

Try making your design come to life by using an old t-shirt!

WHAT TO DO:

1. Cut the sleeves and neckline out of the t-shirt.
2. Cut slits along the bottom of the t-shirt. Make sure you cut the front and back together at the same time, so the slits are the same size.
3. Turn the t-shirt inside out.
4. Tie the front and back tassels together in a knot and then tie the knots together so there are no gaps.
5. Turn your t-shirt the right way and your bag is ready to use!

TOP TIP:

You could sew or draw messages onto the t-shirt to personalise your design-a-bag. You could use this to promote messages of recycling and nature conservation.
