Poo

WHAT IS ALGEBRA?

Algebra is where symbols are used instead of numbers. Usually they use letters (typically x and y) but we thought it would be fun to use our 3P's: Toilet paper, pee and poo!

Can you solve these calculations?

Look at the number sentence below. What number does represent in these equations?

$$6 + \text{Poo} = 10 \quad \text{Poo} =$$

$$10 - \text{Poo} = 3 \quad \text{Poo} =$$

$$8 + \text{Poo} = 10 \quad \text{Poo} =$$

$$10 - \text{Poo} = 5 \quad \text{Poo} =$$

$$9 + \text{Poo} = 10 \quad \text{Poo} =$$

$$10 - \text{Poo} = 1 \quad \text{Poo} =$$

If  $\text{Poo} = 5$ ,  $\text{Pee} = 4$  and  $\text{Toilet paper} = 6$

can you work out the calculations below?

$$\text{Poo} + \text{Poo} =$$

$$\text{Poo} + \text{Toilet paper} + \text{Pee} =$$

$$\text{Toilet paper} + \text{Toilet paper} =$$

$$\text{Poo} + \text{Poo} + \text{Pee} =$$

$$\text{Pee} + \text{Pee} =$$

$$\text{Toilet paper} + \text{Pee} + \text{Toilet paper} =$$

$$\text{Toilet paper} + \text{Pee} =$$

$$\text{Poo} + \text{Toilet paper} + \text{Poo} =$$

$$\text{Toilet paper} + \text{Poo} =$$

$$\text{Toilet paper} + \text{Toilet paper} + \text{Toilet paper} =$$

Can you solve these calculations?

Lets try some longer equations. Be sure to read carefully first!

4  is the same as  +  +  +  or 4x 

If  = 20     = 5     = 10 and  = 9

Work out the calculations below:

3  +  =

6  ÷  =

8  -  =

8  + 6  =

5  +  =

10  ÷  =

9  -  =

7  + 12  =
