## About this document

### Indicative wholesale charges non-households

#### **1 April 2024 to 31 March 2025**

Ofwat published IN16-02 in March 2016. This set out new requirements for companies to publish indicative wholesale access charges. The charges contained in this document therefore represent the charges we expect to set for 2024-25 subject to any unforeseen significant changes in assumptions.

Wholesale charges are limited by inflation-linked revenue controls set by Ofwat. Final charges will depend on the rate of inflation as per the CPIH figure for November 2023, which will be published in December. Our final wholesale charges will be published by 12 January 2024.

Charging zones for unmetered charges

As there are differences in the average levels of **rateable value** throughout **our** area, **we** vary **our** charges according to the area (or zone) the property is in. There are ten geographical zones in **our** region. This map provides a guide to the area covered by each zone. The zone marked ‘S’ is where the water supply is provided by South Staffs Water Plc. **Zone 10** (not shown on the map) is a small area on the border of England and Wales just below Zone 9.

## Section B: Wholesale charges for 2024-25

### B1 Introduction

This section of the document sets out **our** indicative wholesale charges for 2024-25.

*Please note that in Chester (Zone 9) and Wrexham (Zone 10), used and surface water services are mainly provided by United Utilities or Welsh Water. Where we provide the relevant service the following charges apply.*
