How we charge for tankered domestic waste;

All tankered domestic waste will be received through a logging device that measures its volume and its strength.

A 'per cubic meter' charge is made for two tiers of waste:

- waste with a non dissolved solids content of 800 mg/l or below is classified as 'weak'
- waste with a non dissolved solids content of 801 mg/l or above is classified as 'standard'

Details of our annual charges can be found on the Tariffs Page on the web site.
