

Liquid Commercial Waste

SEVERN
TRENT

Why work with us?

We currently operate ten liquid waste treatment facilities across the central region of England. Of these sites, two are permitted to process certain kinds of hazardous waste.

There's more information on the type of waste accepted at our sites later in this leaflet.

There are two methods of treatment for the liquid wastes we receive:

- Aerobic treatment of weaker liquids discharged via the inlet.
- Anaerobic treatment through the digesters - this produces green renewable energy.

Our liquid commercial waste sites are conveniently located across our region, near to major towns and cities we serve.

We offer a sustainable, ethical and competitive treatment of a wide variety of liquid wastes, which helps our customers to generate green energy and ensures processing residues left are diverted from landfill. Instead, being they're used as an organic fertiliser as due to the high nutrient content.

Our sites

Site name	Area	Address
Finham	Coventry	Gate 2, St Martins Road, Finham, Coventry, CV3 6SD
Netheridge	Gloucester	Netheridge Close, Gloucester, GL2 5LF
Wanlip	Leicester	Fillingate, Wanlip, Leicester, LE7 4PF
Stoke Bardolph	Nottingham	Stoke Lane, Burton Joyce, Nottingham, NG14 5HL
Yaddlethorpe	Scunthorpe	Scotter Road, Scunthorpe, DN17 2BU
Rushmoor	Telford	Rushmoor Lane, Allscott, Telford, TF6 5EX
Monkmoor	Shrewsbury	Monkmoor Lane, Monkmoor, Shrewsbury, SY2 5TL
Strongford	Stoke on Trent	Barlaston Old Road, Barlaston, Stoke on Trent, ST12 9EX
Minworth	Birmingham	Kingsbury Road, Minworth, Sutton Coldfield, B76 9DP
Claymills	Burton on Trent	Meadow Lane, Claymills, Nr Burton on Trent, DE13 0DB

We recycle liquid wastes because we care about the impact these can have on the environment.

It also helps us to reach our goal of producing 50% of all of the energy we use from renewable sources by 2020.

By focusing our efforts to process high chemical oxygen demand (COD) organic liquid wastes through the digesters we generate green energy.

This helps both us and our customers to reduce our carbon footprint.

Our facilities

What we accept

Here are some examples of what we can process:

- Fat/grease trap waste
- Waste anti-freezes & glycols
- Ink washings
- Off-spec/out of date beers/lagers
- Distillery effluents
- Food manufacturing sludges
- DAF plant sludges
- Dairy waste
- Industrial effluents
- Waste toiletries
- Biodiesel by products
- Pharmaceutical waste
- AD plant digestates
- Compost leachates
- Chemical wastes
- Organic acids
- Surfactants
- Cosmetic effluents
- Paint related waste
- Organic solvents**
- Landfill leachates
- Food preparations washings
- Pet food sludges*
- Abattoir washings*

Benefits of working with us

- We have very competitive market rates.
- We aim to be the most sustainable operator in the market.
- No waste goes to landfill.
- Our processing capabilities are sustainable.
- We offer an ethical solution to disposing waste.
- Makes your company more environmentally compliant.
- Recycling of organic and trade wastes helps generate green, renewable energy.
- We accept a wide range of waste types.
- You'll benefit from auditable traceability.

For more info on what we can do for you or to make a booking, call **0345 608 0107** or email **tankeredwaste@severntrent.co.uk**
