

## Map pre-application notes

Our GIS Mapping Team can only provide plans indicating the location of our underground assets. Service pipes and drains are the responsibility of the property owner and should be anticipated if excavating. Plans are provided as a general guide only as to the location of Severn Trent's Water Mains and Sewers, and no Warranty as to their correctness is given or implied.

Cover and invert levels (sewers maps) are provided as standard only with all appropriate payments for plans. (See Form for further details). All Water and Sewer plans are provided at a scale of 1:1250 only.

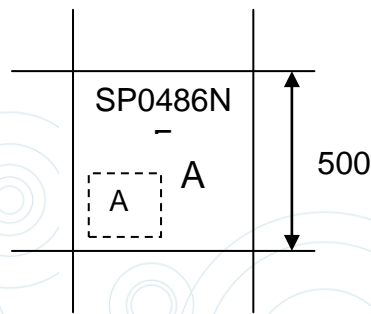

**PLEASE NOTE:** The Form must be signed accepting our Terms and Conditions before maps can be dispatched. Our records can be viewed free of charge (by appointment) at the Company's designated office in Coventry.

### Small sites

Requests for small areas such as cul-de-sacs etc., (less than 500 meters) will only require the basic information on the Map Request Form.

Please provide a simple plan of the area you require. Basic charges will apply as detailed on the form. (All costs shown on the form include VAT.)

Plans will be provided on appropriate size paper dependant upon the site area required (normally A3).

### Large sites

A1 paper plans are provided as standard for all site areas or routes exceeding 500 metres. The Standard charge is applied for the first plan (eg SP0486NW).

All adjacent plans are charged the same as additional copies, (see form).

For large sites please provide a plan of the area you require to ensure complete coverage and we will inform you of the cost.

### Very large sites (Exceeding 1 km square)

To avoid delay in processing your request please provide a plan or list indicating clearly the O/S tile numbers you feel are necessary to cover the area/route you require (eg SP0486NW).

O/S Tile Numbers can be obtained via the Ordnance Survey Website or Google.
