

# NAME THE PLANT PARTS

Take a look at all the different parts of the plant or flower. Can you name them?

Match the name with the correct part of the flower by writing them in the box.

## About plant parts:

**Petals** are coloured and scented to attract insects.

**Leaves** produce food for the plant using sunlight and carbon dioxide.

The **stem** supports the plant. It also carries food, water and nutrients to the rest of the plant.

Plant **roots** grow underground to absorb water and nutrients from the soil.
